

Transitioning New Mexico to a Green Future

La Tierra Interiors, Inc. is pleased to announce the addition of ECO material that is composed of 75% recycled content. The manufacturer, *Cosentino*, a multinational Spanish company which has reinvested a major part of its annual income in promoting new technologies to create this state-of-the-art product. All the manufacturing processes comply with high environmental standards, which makes ECO by *Cosentino* a highly sustainable and unique product.

ECO is an original product manufactured from 75% of recycled materials including mirror, glass, porcelain, earthenware, and vitrified ash. Even 94% of the water used in its manufacturing process is re-used.

Julia Gutierrez, General Manager of La Tierra Interiors, Inc. stated “ECO by *Cosentino* is a new product that embraces sustainability, design and quality that has produced a new category of recycled surfaces. ECO by *Cosentino* is an ecological alternative to similar surfaces available for construction and decoration.”
